

The Audyssey Wireless Speakers

BOLD IS BACK.

Lose the wires and stream from any Bluetooth® enabled device. Audyssey is bringing its suite of technologies to your smartphone, tablet, laptop — all your media. The Wireless Speakers pack clean, deep sound in a valiant little package.

A BETTER BLUETOOTH EXPERIENCE.

Audible Bluetooth pairing makes connecting even easier. Stream from up to 30 feet away and use the auxiliary input for traditional wired-in devices.

BassXT monitors the bass to keep it full and rich. And with a passive bass radiator behind each driver, the Wireless Speakers deliver strong low frequencies.

Audyssey EQ delivers clear and enveloping audio. We make sure you won't miss a note in your movies, music or television.

MSRP \$299.99

Deep Bass. No subs required.

Easy Pairing. Guided by sight and sound.

AUX In. For dual-source audio.

The Audyssey Journey

Audyssey engineers start by designing speaker components from the ground up. We optimize them with our high power algorithms then refine and rigorously test the complete system for clear and natural playback. The speakers adapt in real time to reproduce music and movies most accurately. From our labs to your home, Audyssey technology is keeping the world in tune.
