

Hear the truth™

JBL® CINEMA SB 400

Plug-and-play, 2 x 60-watt soundbar system with virtual surround sound, *Bluetooth*® and HDMI® connectivity, plus a 200-watt, eight-inch wireless powered subwoofer

LEGENDARY SOUND SINCE 1946

FULL CINEMA
SOUND FROM
TOP TO BOTTOM.

The JBL® Cinema SB 400 is a powerful soundbar system that is engineered to be the center of your home theater experience. The 2.1-channel system is a plug-and-play solution. The soundbar incorporates six transducers – four 2-1/4-inch midranges and two 1-inch high-frequency transducers – plus electronics and a 120-watt amplifier in a single, impossibly thin enclosure. An included wireless 200-watt, eight-inch subwoofer delivers powerful, cinematic bass. Designed to complement flat-panel televisions 46 inches and larger, the Cinema SB 400 delivers immersive, premium sound in a nonintrusive, easy-to-install solution. It features exclusive HARMAN Display surround sound, built-in Dolby® Digital decoding, analog and optical digital audio inputs, HDMI® inputs/output and full bass control, as well as *Bluetooth*® connectivity for wireless music streaming.

Highlights

- Plug-and-play solution
- *Bluetooth* connectivity
- Analog and optical digital audio inputs
- HDMI connectivity
- Exclusive HARMAN virtual surround sound
- Dolby Digital decoding
- Powered, wireless subwoofer
- Full bass control
- Dual-position equalization
- TV-volume “learning” capability

KEY FEATURES

JBL® CINEMA SB 400

Hear the truth™

Movies, TV shows and music, anchored with powerful JBL bass. It's showtime.

Plug-and-play solution

The Cinema SB 400 incorporates left and right midrange and high-frequency transducers, plus amplifiers and controls, into a single soundbar. It easily connects to any TV with the included cables. Easy to install, the soundbar requires virtually no setup. Just connect and play.

Bluetooth connectivity

The Cinema SB 400 wirelessly streams music from smartphones and tablets, delivering room-filling, full-range sound reproduction with exceptional bass. The On Screen Display indicates *Bluetooth* connectivity status, along with current source, volume and sound mode.

TV-volume "learning" capability

The Cinema SB 200 comes with a credit-card-sized remote, but you might not need to use it much. That's because the SB 200 can "learn" the volume control IR code of your existing TV remote control, so you can control the soundbar and TV volume with the same remote.

HDMI connectivity

With three HDMI inputs, the Cinema SB 400 provides convenient connection for multiple HDMI source components. It also includes one HDMI output with Audio Return Channel (ARC), which sends the TV sound back to the soundbar. This simplifies switching and makes the system easier to use.

Exclusive HARMAN Display surround sound

Drawing from HARMAN expertise in movie theater audio, the Cinema SB 400 lets you add cinema sound without adding multiple speakers. Employing proprietary HARMAN display surround, it creates a virtual surround-sound experience for multiple listeners – not just one – from a single soundbar.

Dolby Digital decoding

The Cinema SB 400 decodes film soundtracks in their native format, which eliminates conversion stages that reduce sound quality. This helps the soundbar provide a superb surround-sound experience for multiple listeners.

Powered, wireless subwoofer

Nothing draws you into the action like huge bass. The subwoofer's eight-inch low-frequency transducer and built-in 200-watt amplifier deliver all of your entertainment's impact, emotion and excitement. And because it's wireless, there are no unsightly wires between soundbar and subwoofer.

Full bass control

The Cinema SB 400 increases your control over the audio experience. It features a dedicated control that lets you adjust volume, frequency and subwoofer output phase, so you can optimize the sound for each movie or TV show.

Dual-position equalization

The Cinema SB 400 can either be placed on a shelf or tabletop, or wall-mounted with included hardware. A dual-position equalization feature optimizes the soundbar's performance for either placement, so you can position it where you choose without compromising sound quality.

SPECIFICATIONS

JBL® CINEMA SB 400

Hear the truth™

A superstar home theater ensemble cast – in just two components.

What's included:

- 1 Cinema SB 400 soundbar
- 1 Eight-inch wireless subwoofer
- 1 IR remote control
- 1 Power cable
- 1 Optical audio cable
- 1 Analog audio cable
- 1 Wall-mounting bracket
- 1 Quick-Start Guide

SPECS AND INFORMATION

Cinema SB 400 System

Frequency response: 38Hz – 20kHz

Cinema SB 400 Soundbar

Midrange transducers: Two 2-1/4" (57mm) cones per channel, video shielded
High-frequency transducers: One 1" (25mm) dome per channel, video shielded
Amplifier power (@ 1% THD+N): 60 watts per channel
Enclosure type: Ported
Frequency response: 120Hz – 20kHz
Power requirement: 100V – 240V, 50/60Hz, 60W
Power consumption: <0.5W (standby); 60W (maximum)
Dimensions (H x W x D): 3-3/4" x 43-5/16" x 2-1/2"
(95mm x 1100mm x 64mm)
Weight: 7.3 lb. (3.3kg)

Cinema SB 400 Subwoofer

Low-frequency transducer: One 8" (203mm) cone, down-firing
Amplifier power: 100 watts RMS, 200 watts peak
Enclosure type: Ported
Frequency response: 38Hz – 120Hz
Audio controls: Volume, phase, crossover frequency
Power requirement: 100V – 240V, 50/60Hz, 100W
Power consumption: <0.5W (standby); 100W (maximum)
Dimensions (H x W x D): 14" x 13" x 12-5/8"
(355mm x 329mm x 320mm)
Weight: 23.1 lb. (10.5kg)
