

## IT ALL STARTS WITH CLEAN POWER™

Power Quality Can Affect Picture & Sound Performance from Your Home Theater System

Monster's PowerCenters™ featuring Clean Power™ filters protect your components from noise for a cleaner sound and fewer video artifacts. Monster's AVS 2000 Voltage Stabilizer™ delivers a steady 120 volts to your system for greater dynamics and more focused sound. Damaging surges and spikes can enter your home theater system from your video cable lines coming from an outside source. Make sure to connect them through a Monster Power® PowerCenter™.
