

NEW SANUS FOUNDATIONS[®] COMPONENT SERIES AV RACKS

Introducing the SANUS 100 Series Racks – the Second Generation

The engineers at SANUS took the Component Series racks to the next level with the SANUS 100 Series Racks – the Second Generation. Constructed of heavy-gage welded steel, the 100 Series come pre-assembled with vented shelves and blanking panels to simplify ordering and installation. Improvements to the Second Generation include both side and back quick-release panels for easy access to components and additional cooling vents at the top and bottom of the racks for more efficient temperature management. The lockable tempered glass front door can be placed on the left or right and multiple 3U removable panels add increased versatility. The Second Generation of SANUS Component 100 Series Racks come in four sizes (15U, 27U, 36U, and 44U) with the added ability to be gangable so you'll always have the right solution for every installation.
