TV dimensions vary widely, therefore it is important to confirm that the dimensions of your specific TV will be compatible with the furniture shown above. Sanus does not warrant that any TV within the size ranges above will fit onto the specified furniture.

COMPONENT AV FOUNDATIONS

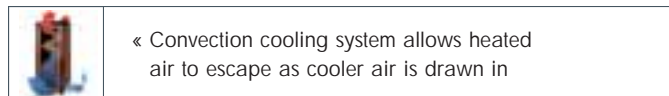

Built to perform for home theater junkies with no compromising on aesthetics

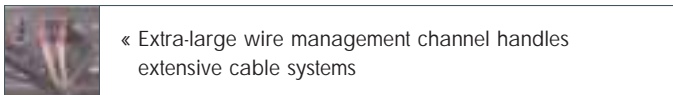

It's easy to find a nice looking cabinet ... that won't fit your gear or keep it cool. And it's easy to find a high-test rack ... that won't pass the spouse test for appearance. That's why we set out to redesign our Component furniture line. We're introducing a solution. High-test, vented, large-cavity, cable-organizing, resonance absorbing cabinets with the beauty of natural hardwoods and contemporary design elements such as extruded aluminum pillars. It's more than a mouthful. It's a masterpiece.

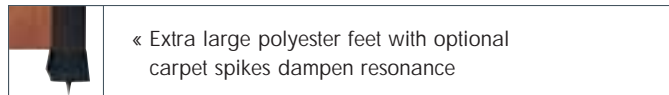

« Center channel cavity with speaker grill cloth on CFV69 allows for concealed speaker placement

« Convection cooling system allows heated air to escape as cooler air is drawn in

« Extra-large wire management channel handles extensive cable systems

« Extra large polyester feet with optional carpet spikes dampen resonance

WOODBROOK AV FOUNDATIONS

Fine furniture that satisfies both AV and interior design enthusiasts

Passion meets creativity in Sanus Woodbrook furniture. Connoisseurs of fine furniture will be pleasantly surprised by the quality of the construction, with beautiful materials such as solid hardwoods and natural glass. But the real beauty lies in the creative flexibility to design each piece with included door options for the prominent display or clever concealing of AV components. The result is an AV setting with clean lines and a timeless look that's sure to inspire.

« Custom-engineered construction using a heart of medium density material virtually eliminates resonance

« Convection cooling system allows heated air to escape as cooler air is drawn in

« Finished with Grade A hardwood in maple, cherry or mocha

« Versatile line includes removable glass and wood doors to allow a truly unique design

JAVA AV FOUNDATIONS

Versatile, rock solid design supports any combination of AV gear

Beautiful espresso-finished oak veneers are complemented by fluted, tempered glass doors with extruded aluminum frames. Deep shelves have removable backs for easy wiring, and middle shelves can be removed for tall amps and changers. Built-in ventilation system allows cool air to flow in from bottom while heated air rises out of hidden vents at top.

« Solid, contemporary furniture construction with beautiful, hardwood oak veneers in an espresso finish

« Unique fluted glass provides a crisp, clean, contemporary look

« Aluminum accents offer a feather-light feel for this rock solid piece

« Premium nylon glides with steel bearings allow smooth, swift access to components

NATURAL AV FOUNDATIONS

Contemporary design and rigid construction come together to create strength and beauty

The Natural Furniture line from Sanus Systems is elegant. It's contemporary. And it's functional. When designing Natural Furniture, Sanus set out to create an element of lasting beauty. But the real beauty is in the engineering. Solid Grade A hardwood, extra-thick tempered glass and rigid steel pillars provide incredible strength. And with a full complement of accessory pieces, it's easy to decorate an entire room.

« Concealed wire path keeps even the largest cables hidden

« Open architecture allows unrestricted airflow for cooling

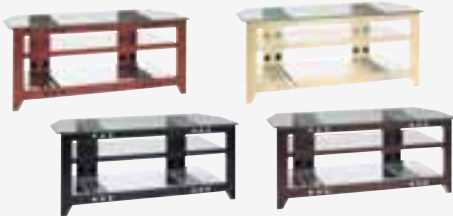

« Extra-thick tempered glass is finished with rounded edges

« Angled top shelf rear corners offer flexibility in positioning

PLATINUM AV FOUNDATIONS

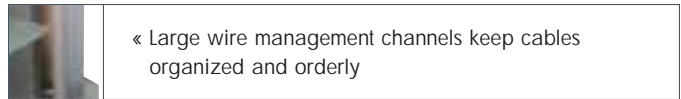

The perfect stand for your digital TV, whatever size it happens to be

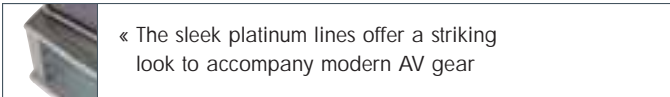

An elegant silver or black finish is custom-blended to perfectly match today's digital televisions. And Platinum furniture is constructed of high-quality materials that provide the enhanced strength and durability needed to handle even the largest televisions.

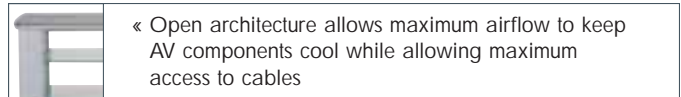

« Extra-thick adjustable glass shelves for a sleek, modern look

« Large wire management channels keep cables organized and orderly

« The sleek platinum lines offer a striking look to accompany modern AV gear

« Open architecture allows maximum airflow to keep AV components cool while allowing maximum access to cables

Model SFV49b shown with Euro Speaker Foundations EF28b

STEEL AV FOUNDATIONS

Rigid strength and contemporary design in an affordable package

Now you can have the strength of steel without making your AV gear and room look like a warehouse. Heavy-gauge steel is powder-coated with a lasting and beautiful silver or black finish. Tops and shelves are of extra-thick frosted or black glass to securely support most any TV and a full complement of AV components. Choose from four sizes – all with Sanus' trademark features such as a wire management path and adjustable feet.

« Tempered glass tops and shelves are extra thick for additional support

« Wire management path neatly and safely routes wires and cables

ACCURATE AV FOUNDATIONS

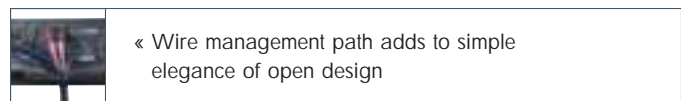

Modular furniture with contemporary open architecture

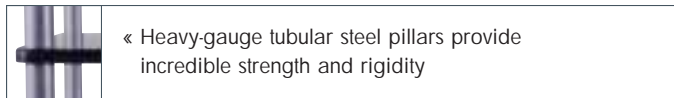

Designed and built specifically for today's digital TVs, Sanus Accurate Furniture features quality construction at an affordable price. Three sizes hold virtually every tabletop digital TV including traditional TVs, LCD flat panels, tabletop rear-projection TVs, plasma TVs and more. Choose from a low luster acid catalyzed black lacquer finish or thick, sleek glass. Either way, you'll have the benefits of a strong tubular steel frame, a wire management path, and a versatile, modern design.

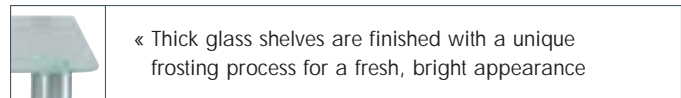

« Easy-to-assemble units can be built or expanded in minutes

« Wire management path adds to simple elegance of open design

« Heavy-gauge tubular steel pillars provide incredible strength and rigidity

« Thick glass shelves are finished with a unique frosting process for a fresh, bright appearance

POSSIBLE SPEAKER SIZE RANGE	RECOMMENDED SPEAKER SIZE
-----------------------------	--------------------------

Choosing the right Speaker Foundations®

Helping customers mount and position the speakers correctly can be more important to sound quality than choosing components. For optimal sound, the tweeter should be at ear level. For most installations, the correct height is around 40 inches (give or take 5 inches). Key factors that affect this are the height of the listener and the height of the listener's chair.

ULTIMATE SPEAKER FOUNDATIONS

The ultimate acoustics for a true audiophile experience

When the Sanus engineers and Cramer Studio set out to create Ultimate Foundations, they left no stone unturned in their quest for acoustic perfection. They started with a base constructed of an energy absorbing material created with components of minerals, resin and glass. Next, they created a support of not one, not two, but three large diameter heavy-gauge steel pillars designed to be filled with sand or shot. This creates a speaker stand weighing more than 80 pounds. And they finished this masterpiece with an ultra-heavy-gauge steel top plate complete with brass isolation studs. The result truly is acoustic perfection.

« Brass speaker isolation studs provide a stable non-slip surface

« Integrated Poron® rings isolate speaker from vibrations in the floor

« Wide triangular base with spikes and rubber pads provides superior stability on any surface

« Steel pillars can be filled with shot or sand for added stability

Model UF30b shown with Component AV Foundations models CFV47e and CFA56e

STEEL SPEAKER FOUNDATIONS

The perfect home theater solution

Resonance damping rings and adjustable isolation studs provide superior acoustic isolation. Our Foundation Mount™ system provides safe and secure bolt mounting to many of today's speakers. The heavy-gauge tubular steel pillars can be filled with sand or shot for increased mass. A wire management system keeps speaker cables neatly organized. And the heavy 10-gauge steel base was designed by Cramer Studio and includes both adjustable spikes and rubber feet.

NATURAL SPEAKER FOUNDATIONS

High-performance speaker supports with the beauty of real hardwood construction

The softly contoured, hand-rubbed, black lacquer base is constructed of acoustically-superior MDF and comes with both premium adjustable carpet spikes and polyester feet. The extra thick pillar is constructed of solid hardwood for the perfect combination of beauty and quality. A patented wire management channel safely hides speaker cables behind the pillar. And the strong but inconspicuous MDF top plate comes with brass speaker studs and neoprene isolation pads.

	WEIGHT CAPACITY 20 lbs 9 kg	SPEAKER ADJUSTMENT Up to 13" Up to 33 cm	

EURO SPEAKER FOUNDATIONS

Elevating European design to a new height of performance

A sleek, contemporary look complements today's loudspeakers and provides the quiet, rigid performance demanded by audiophiles and home theater enthusiasts. The cast iron base is engineered for solid support and superior performance. Both premium adjustable floor spikes, and custom screw-in rubber feet are included to provide stability and minimize resonance on any floor surface. And the steel top plate features custom speaker isolation pads.

« Wire management path conceals and protects wires for a clean look

« Neoprene speaker pads increase sound quality with acoustic isolation

Model BF24b shown with Euro AV Foundations EFAV-IIc and EFVS-IIc

BASIC SPEAKER FOUNDATIONS

Simple, yet elegant, these speaker stands raise any speaker to the proper listening height

Basic Foundations may be affordable, but they're certainly not cheap. The construction begins with energy-absorbing MDF, not particle board. Add to that features like ABS plastic spikes, a concealed wire path and neoprene speaker isolation pads, and you've got sound Foundations for your speakers. Plus the powder-coated black finish blends seamlessly into most any setting.

« Powder-coated black finish is both durable and elegant

« Neoprene speaker isolation pads provide a soft, non-slip surface

« Energy-absorbing MDF construction increases sound quality by providing acoustic isolation

« Sturdy ABS plastic push-in spikes provide a solid foundation on most any surface

« Patented concealed wire path hides even the largest cables from view

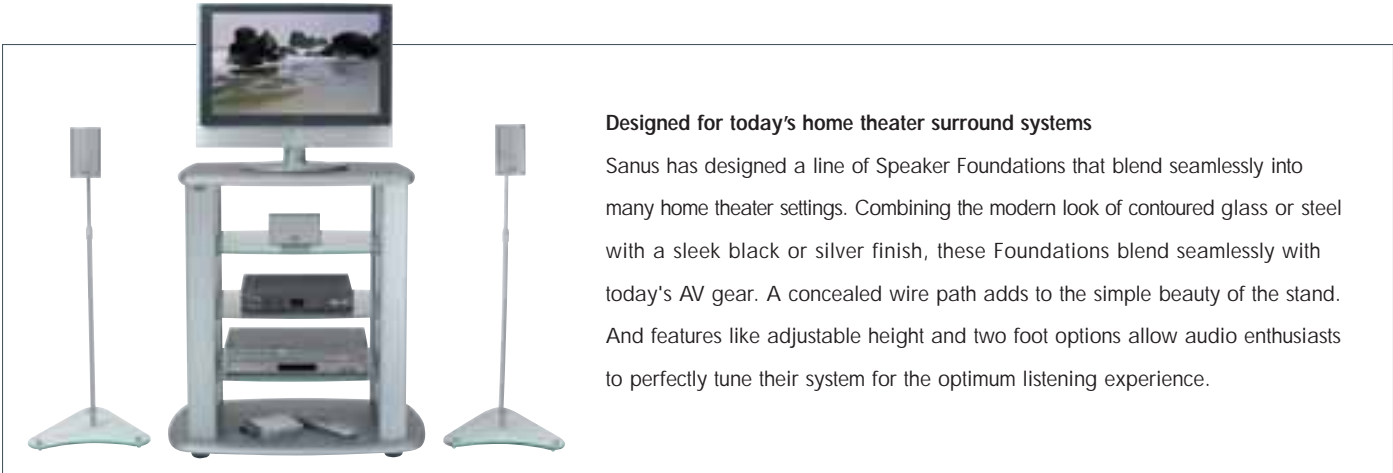

« Three height options allow speakers to be perfectly placed for a custom audio experience

MODEL BF16b 	DESCRIPTION 16" tall with 7" x 7" top plate for medium to large bookshelf speakers; sold in pairs

HTB SPEAKER FOUNDATIONS

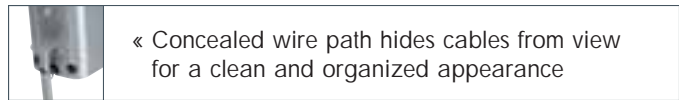

Designed for today's home theater surround systems

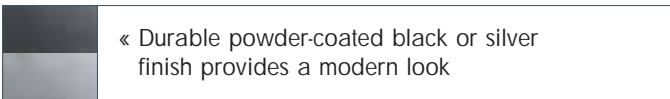

Sanus has designed a line of Speaker Foundations that blend seamlessly into many home theater settings. Combining the modern look of contoured glass or steel with a sleek black or silver finish, these Foundations blend seamlessly with today's AV gear. A concealed wire path adds to the simple beauty of the stand. And features like adjustable height and two foot options allow audio enthusiasts to perfectly tune their system for the optimum listening experience.

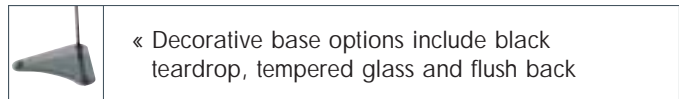

« Includes brackets and top plates to fit most small speakers

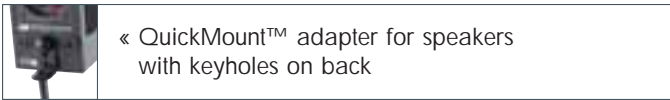

« Concealed wire path hides cables from view for a clean and organized appearance

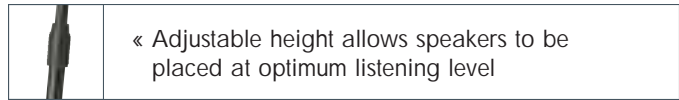

« Durable powder-coated black or silver finish provides a modern look

« Decorative base options include black teardrop, tempered glass and flush back

« QuickMount™ adapter for speakers with keyholes on back

« Adjustable height allows speakers to be placed at optimum listening level

HOVER SPEAKER FOUNDATIONS

The first speaker stand designed to meet Dolby Laboratories specifications

The proper positioning of home theater satellite speakers is not as obvious as it seems. While many people enjoy sound reproduced from speakers at ear level, the correct positioning, according to Dolby Laboratories, is actually several feet above ear level. Enter Hover Foundations. These heavy duty cast iron and steel speaker stands are the first ever that meet the placement guidelines of Dolby Laboratories. And they do so with rugged construction designed to hold speakers up to 10 lbs. and include features like adjustable height and a concealed wire management path. Plus, Hover Foundations include both straight and angled pillars for Dolby surround or direct listening. Get ready to hear what Dolby Digital REALLY sounds like.

« Adjustable height allows speakers to be placed at optimum listening level

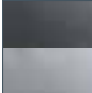

« High-mass cast iron base includes adjustable carpet spikes and rubber pads for stability on any surface

« Includes top plates and brackets to fit most small speakers

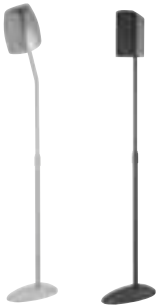

« Concealed wire path hides cables from view for a clean and organized appearance

« Durable powder-coated black or silver finish provides a modern look

« Easy assembly can be completed in minutes with just one Phillips screwdriver
