"Theago" means theater...to go.

The Sharp *Theago* is just that—a remarkable compact movie projector that's portable enough to take almost anywhere. Its revolutionary dual mode DLP™ (Digital Light Processor) chip, along with Sharp's industry-leading front projection technology, let *Theago* give you brilliant images in either widescreen 16:9 or traditional 4:3.

- *Theago* connects to almost any video source (television, DVD, computer, video games). and can *project* an image up to *120 inches* (or *10 feet!*) diagonally.
- Component video input allows easy connection of DVD
- *Theago* offers DVI and HDCP connectivity for compatibility with the latest set-top boxes. It's ready for HDTV today and *won't* be obsolete tomorrow.
- *Theago* also offers distinct advantages over LCD:
 - Higher contrast ratio
 - More uniform images
 - Less pixelization
 - An enclosed fixture that's free of dust

**NOTE: Theago can give you a picture nearly twice the size of even the largest rear projection televisions, yet it's both portable and affordable.*

Accessories that enhance the experience.

Custom designed accessories complement the design and the performance of *Theago*.

- A stylish floor-based “end table” stand
- Ceiling mount brackets
(or *Theago* can be placed on a table)
- Fixed-mount and portable, roll-up screens in traditional 4:3 and widescreen 16:9 sizes ranging from 70 to 100 inches.
- Optional SD-AT50DV Home Theater System features a progressive scan DVD player (also plays CDs, CD-R/RWs and MP3s) and 1-Bit audio system. Six-speaker package creates dramatic surround sound and includes powerful subwoofer.
