

## XBA-2

## Dual Balanced Armature Headphones

Step up to Sony® Balanced Armature and step up to a revolution in audio. A full range driver, plus one woofer driver, delivers clear vocals and rich powerful bass. Rediscover every note and all the emotion of your favorite music with the world's only drivers optimized for music enjoyment.

### Sound Story

Compared to conventional Dynamic drivers, Balanced Armature drivers produce a broad and even frequency response with notable vocal clarity. SONY® Balanced Armature drivers are tuned for higher or lower frequency response and combined to emphasize certain sound characteristics.

### Balanced Armature Driver

Newly developed micro-size driver units (full-range + woofer) reproduce smooth and clear vocals and rich, powerful bass. Get reacquainted with your favorite music.

### Double Layer Housing

A special, high strength magnesium inner housing provides necessary rigidity for smooth frequency response, while an ABS outer housing suppresses vibrations for clear mid-high range sound reproduction.

### Wearing Comfort

The ultra-compact design of a Balanced Armature (BA) driver allows for a natural in-ear fit which translates to better, long-term comfort.

### Noise Blocking Design

Sony® XBA-Series Earbuds provide a comfortable fit that also results in significantly lower sound leakage levels both in or out, allowing you uninterrupted access to your music.

### Secure Fit

Hybrid silicone earbuds, in 4 sizes, allow for a tailored fit that further maximizes overall sound quality and comfort.

### Noise Attenuation

Noise isolation earbuds (Included: Small, Medium, and Large) not only provide an outstanding fit, but also utilize pressure relieving urethane foam to further reduce ambient noise.

## Specifications

Audio	
Driver Unit	Closed, Dual Balanced Armature
Frequency Response	4 - 25,000 Hz
Impedance	12 ohms at 1 kHz
Sensitivity (db)	108 dB/mW
Audio Features	
Ear Cups	N/A
General	
Case Type	Nylon Carrying Case
Plug	Gold-plated L-type stereo mini plug
Type of Use	Portable
Hardware	
Cord	47 1/4 in. (1.2 m), OFC Litz cord neck-chain
Headphone Type	Vertical in-the-ear style earbuds

## Power

Power Handling Capacity	100 mW (IEC)
