ADVANTAGE TOSHIBA

- >> New Talen DLP™ Light Engine with IDEAL (Intelligent Dynamic Algorithms and Lens control)
- >> ATSC/QAM Tuners enable the set to receive digital cable-in-the-clear signals, as well as digital terrestrial broadcasts.
- >> CableCARD™ allows for the reception of all applicable digital cable channels without the need of a cable box. This card is supplied by the local Cable MSO.
- >> PixelPure™ is a suite of 8 different digital video processing circuits that combine to create a consistently clearer, deeper and more accurate picture. PixelPure™ is the key to Toshiba's fixed pixel picture quality; it is the processing that makes the picture.
- >> OmniViewer™ Memory Card Slots accommodate 5 different types of memory cards (SD, MM, MS, CF, SM) and includes a JPEG Viewer program that allows the TV to display pictures from most digital cameras.
