

## DVD Tutorial

We believe your entertainment experience should be the best, so each remote we make is designed with you, the user, in mind. "The Power Of Simple" is the idea we live by, in order to make your experience the best - by making it SIMPLE! Sometimes, designing feature-packed remotes is not enough, so we make every effort to take our remotes a step further and make them *easy to use*. In efforts to make your experience even simpler, we are proud to be the first remote manufacturer to offer a line of consumer remotes, which include a DVD video to walk you step-by-step through setting up your remote.

Here are just a few screen shots of what you can expect to see on the DVD:

**Eric Johnson hosts the DVD and will walk you step-by-step through setup of your remote.**

**The main menu works just like the menu of a DVD movie!**

**Select the topic you would like to learn about.**

**While Eric explains the steps, you can follow the steps on the video as well.**

**At the end of the video segment, you can see a recap of the steps you just performed.**

**Once you've programmed your remote, you can choose to view instructions on setting up the optional RF Expander.**

### Editing Button Labels

Rename any screen labeled button or MAIN device button.

1. Press the MAIN Button and the ENT button, choose EDIT, then TEXT.
2. Navigate to the button you want to edit and select it.
3. Use the CURSOR buttons and the number keys to change the button label.
4. Press the button you edited to save changes.
5. Press the MAIN button four times to exit setup.

## No More Pointing!

Using the Expander Kit to control your system from anywhere in your house.

**See how your remote can be used from other rooms or even outdoors, to control devices with the optional Expander!**

**The Expander sends IR commands to your devices, so you don't need to point your remote at them.**

**Adding the Expander means you can be a great distance away from your devices and enjoy music or video from various locations!**

**Normal Range  
50 to 100 Feet**
